- All regular adjustments are 15 minutes.
- Refunds on care packages are worked out by subtracting the number of adjustments received (at full price of \$65), from the original package price.
- All changes in appointments require a minimum of 24 hrs notice
- Changes for **care package adjustments** prior to 24 hrs need to be rescheduled rather than omitted (or they are lost).

Care Package Standards and Policies

- People on care packages (not PAYG) are on 'same time/same day' appointment schedules, arranged and agreed to, by **you** and the practitioner.
- Terms: **Reschedule**: making another appointment in accordance with your adjusting schedule, within the same week, or early the following week (subsequent future adjustments stay the same).
- **Cancellation**: Omitting an adjustment without rescheduling (generally this visit will be taken off your care package).
- If you are away on holidays, let us know in advance and we will take you out of your timeslot so we can utilise it while you are away. Your schedule will resume as per agreement on your return.
- All of these measures above, we feel (with our experience with health schedules for best results), allow you to access cost-effective, sustainable, long-term adjustments for 15 minutes of care (relatively long treatment times with chiropractic). Therefore, better health rituals and rhythms are created, with less stress for all.
